

Coding & Solution

Date	25 May 2026
Team ID	xxxxxx
Project Name	Smart Lender – AI Loan Approval Prediction System
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/manasakakaraparthi/Smart-Lender-AI-Loan-Approval-Prediction-System
Programming Language(s)	Python, JavaScript, Java
Framework(s) Used	Flask, React, Spring Boot
Key Features Implemented	Loan eligibility prediction, applicant data processing, machine learning model integration, responsive web interface, prediction result display
Pending / Incomplete Features	Real-time credit score integration, user authentication, prediction history
Setup / Run Instructions	Install dependencies using <code>pip install -r requirements.txt</code> , then run <code>python app.py</code> and open the displayed localhost URL in a web browser.

Code Quality Checklist

S.N o	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:
