

Customer Journey Map

Date	25 May 2026
Team ID	xxxxxx
Project Name	Smart Lender – AI Loan Approval Prediction System
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Describing the Challenge	Stage 2: Emotion Prediction & Guidance	Stage 3: Reflection & Progress Tracking
Actions <i>What does the customer do?</i>	- Opens the Smart Lender website. - Enters loan details. - Clicks Submit.	- System processes the data. - ML model predicts loan eligibility.	- Views Approved/Rejected result. - Reviews the prediction.
Touchpoint <i>What part of the service do they interact with?</i>	- Streamlit user interface - Free-text challenge input box - Submit / Analyze button	- Emotion confidence breakdown - BiLSTM vs BERT comparison panel - AI response toggle (Gemini)	- Personalized tips & next-steps panel - Analytics dashboard - CSV interaction log
Customer Thought <i>What is the customer thinking?</i>	"Will it actually understand what I'm struggling with?" "Is this just keyword matching, or real understanding?" "How accurate will the prediction be?"	"Does this really reflect how I feel?" "Which model's result should I trust more?" "Are these tips actually relevant to my problem?"	"Am I improving over time?" "Will this help me next time I'm stuck?" "Could my instructor use this to support me better?"
Customer Feeling <i>What is the customer feeling?</i>	Uncertain, Hopeful	Curious, Reassured	Encouraged, Motivated
Process Ownership <i>Who is in the lead on this?</i>	User / Streamlit Frontend	BiLSTM & BERT Models / Gemini AI	Analytics Backend / CSV Log Store
Opportunities <i>How can we improve this stage?</i>	- Add voice-to-text input for describing challenges - Support multilingual input - Offer auto-suggested prompt templates	- Improve model calibration with more training data - Add explainability for each prediction - Reduce response latency for real-time feel	- Add personalized learning-path recommendations - Integrate with an instructor/LMS dashboard - Add gamified progress badges
